

Egg Mixes & Blends

READY-TO-USE EGGS. NO MESS.

Crystal Lake provides high quality egg mixes and blends in refrigerated or frozen liquid, any blend with added egg and non-egg ingredients, and in 2 lb. cartons up to 48,000 lb. tankers. With all, these are ready-to-use eggs with no mess of breaking eggs or waste of unusable eggs. They require less storage space than a comparable amount of shell eggs and are pre-blended with ingredients and homogenized to make products such as scrambled egg mix with milk and fortified egg.

All Crystal Lake products are processed and pasteurized under continuous supervision of USDA's Food Safety Inspection Service. They are also Kosher Certified by Orthodox Union Supervision and produced under a routine quality inspection in accordance with good manufacturing practices.
